How-to guide: every button and key, step by step

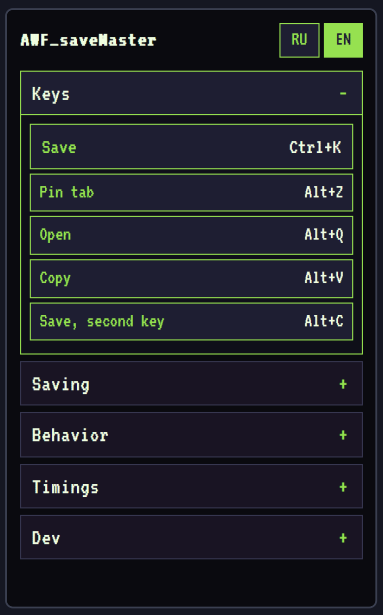

Version 1.4.5 · 31 Oct 2026

01 Open the extension and pick a language
02 Save a picture with one key
03 Hold menu: Q W A S D
04 Tab menu
05 Layer Scalpel
06 Look under overlays (automatic)
07 Zoom
08 Switching tabs
09 Viewer
10 Popup: Keys
11 Popup: Saving
12 Popup: Behavior
13 Popup: Timings
14 Popup: Dev

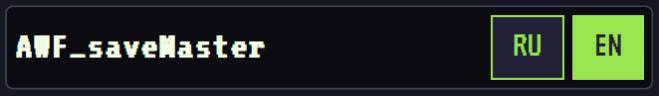

01. Open the extension and pick a language

Saves pictures and videos from any page with one key. Settings are in the popup.

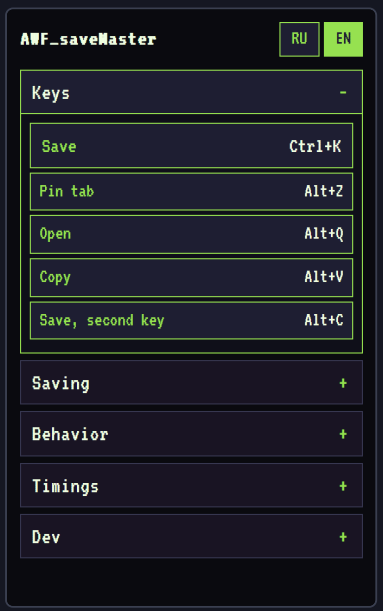

1 Click the extension icon.

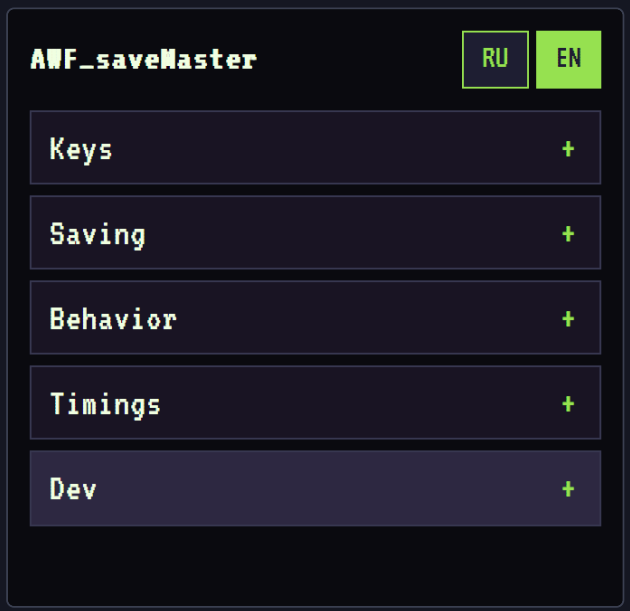

2 Language of the popup and on-page menus. Green = active.

3 Click a title to open it; only one block stays open. Click again to close. The last open block is remembered.

02. Save a picture with one key

1. Point at a picture. The green frame shows what will be saved.

2. Tap `Ctrl` + `K`.

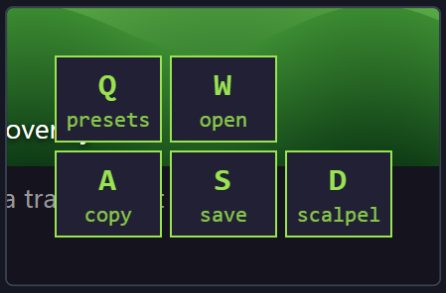

```
Saved: download.png
```

3. Nothing under the cursor:

```
No picture under the cursor
```

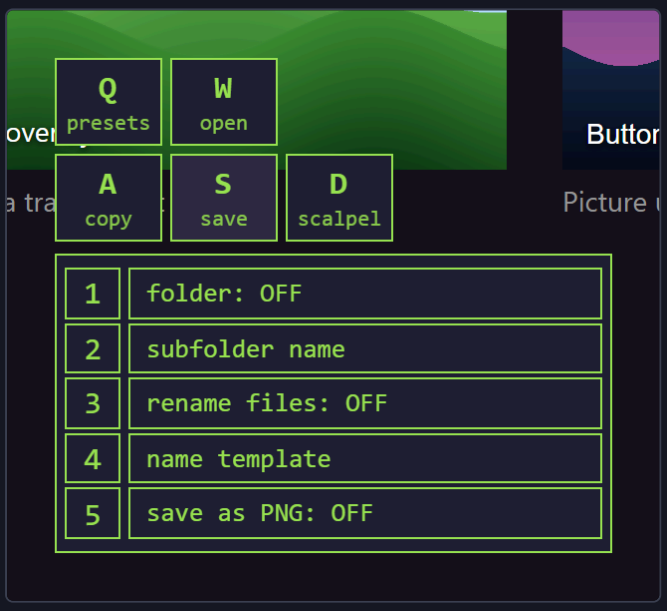

03. Hold menu: Q W A S D

1 Hold `Ctrl` + `K` ~1 s. The menu opens centered on the cursor.

`Q` presets	Slots for saving settings.
`W` open	In the viewer.
`A` copy	File or link.
`S` save	Quick switches.
`D` scalpel	Section 05.
`Esc`	Close.

2 `S`: five switches. Digit `1` ... `5` or click a row.

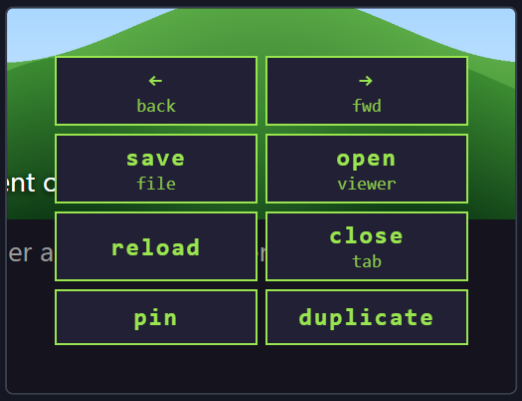

3 `Q`: ten preset slots. Digit or click = load. `~` first = write mode: the next digit stores the current saving settings.

04. Tab menu

1 Keep holding `Ctrl` + `K` (second hold, default ×2).

`←` back	
`→` fwd	
`S` save file	this tab's file
`W` / `O` open viewer	
`R` reload	
`X` close tab	
`P` pin	pin / unpin
`D` duplicate	

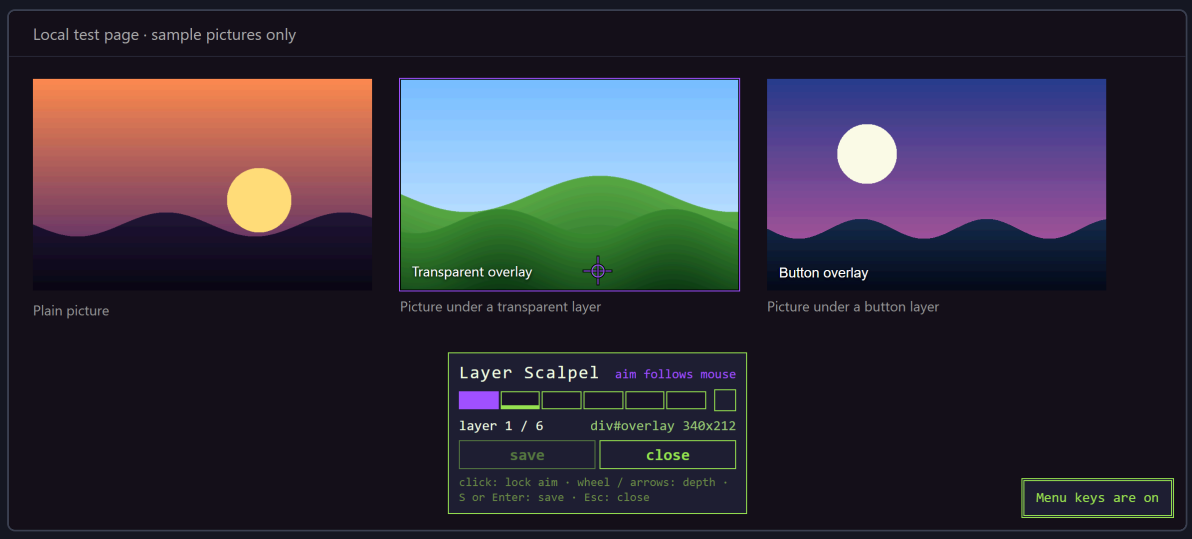

05. Layer Scalpel

Steps through the page layer by layer at one point and saves the layer you pick. The page is not changed.

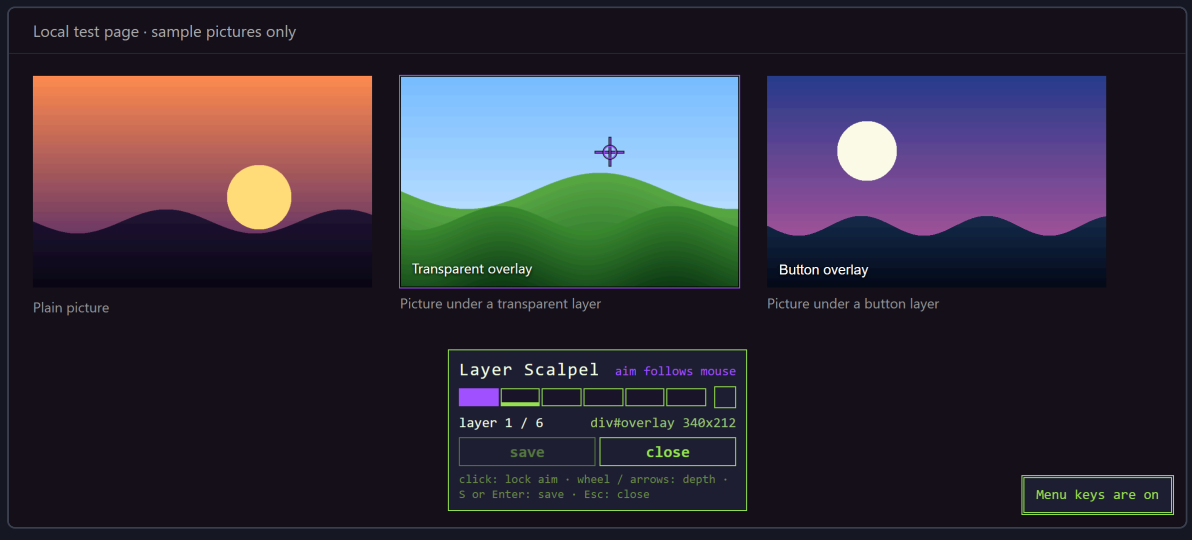

1 Hold `Ctrl` + `K`, press `D`.

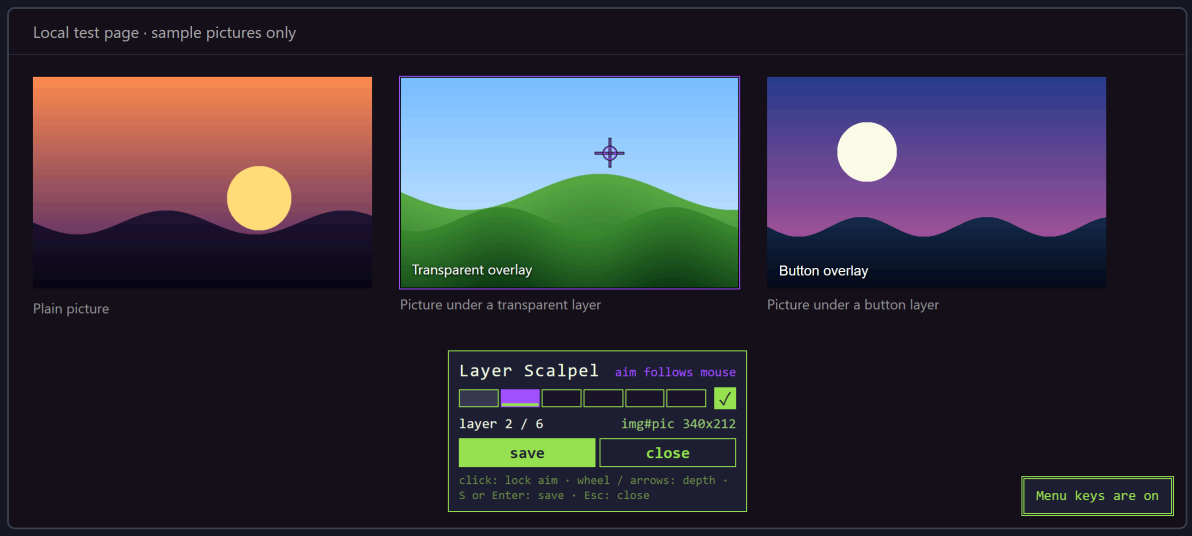

2 A purple crosshair appears in the middle and follows the mouse; the panel is at the bottom.

3 Point at the picture. The purple frame = current layer (here: a transparent overlay).

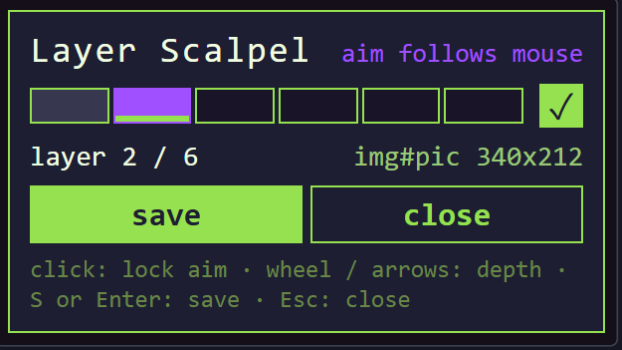

4 Deeper: wheel, → / ↓,]. Back: ← / ↑, [. Or click a segment. Picture or video → green ✓.

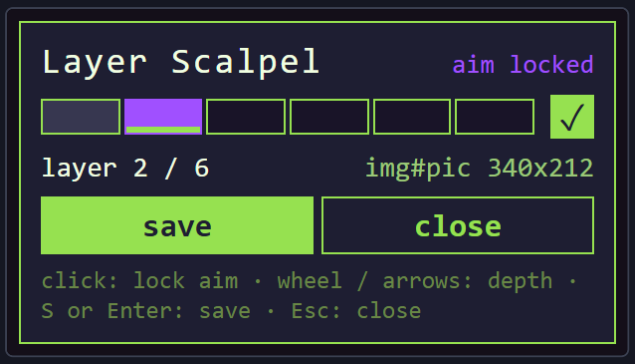

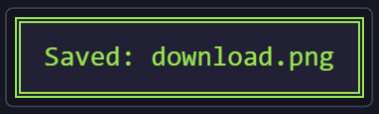

5 Segments: purple = current, grey = passed, green line = picture. Then layer number, element name and size.

6 Click the page or `Space` to lock the aim; the mouse can now go to the panel. Click again to unlock.

7 Save: `S`, `Enter`, save or a tap of `Ctrl` + `K`. The scalpel closes, then saves. No picture on the layer → note only.

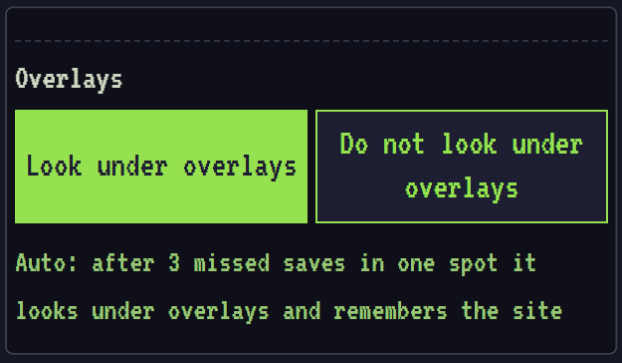

`Esc` or close close it and remove everything it drew. While open, page clicks and keys are blocked.

06. Look under overlays (automatic)

For sites that put an invisible button or frame over the picture.

1 In Behavior. Default: left button.

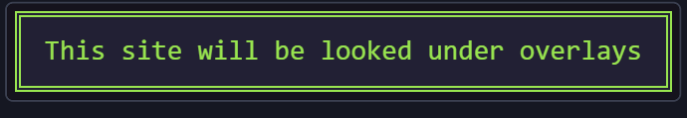

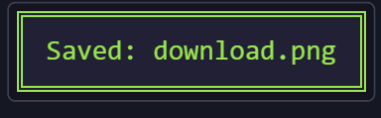

2 Each empty save counts as a miss for that spot.

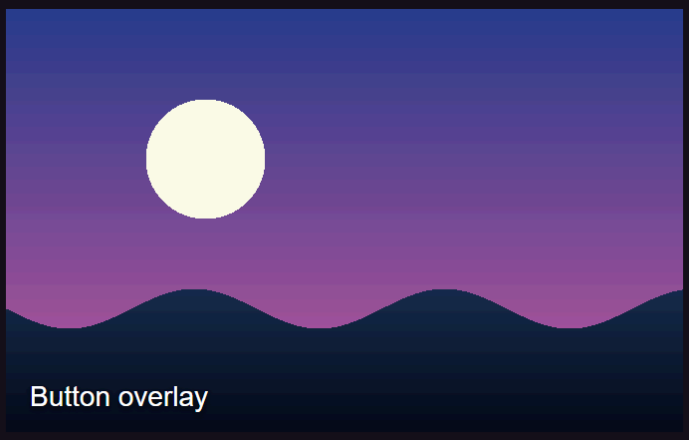

3 3rd miss in the same spot → it looks under the overlays, saves the picture and remembers the site.

4 From then on: look-under always on for this site (hover frame too), saved on the first tap.

Do not look under overlays turns this off. Remembered sites travel with **Download a settings file** / **Load a settings file**. One-off cases: Layer Scalpel.

07. Zoom

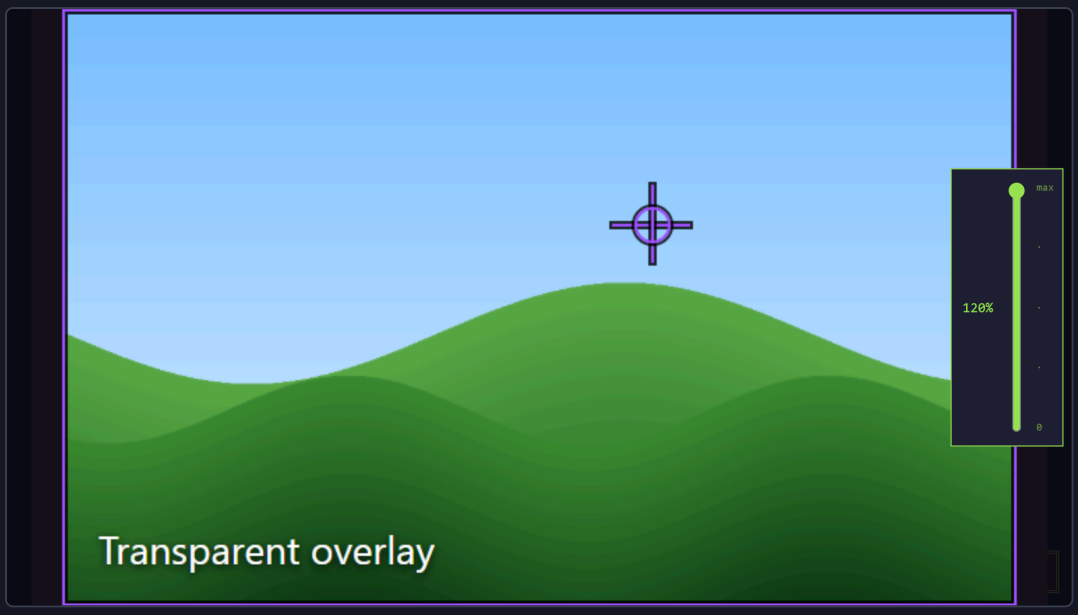

1. Point at a picture and hold the mouse wheel (middle button) for **Hold the wheel to zoom** (Timings).

2. Slider on the right: max ... 0. Bottom (0) closes zoom.

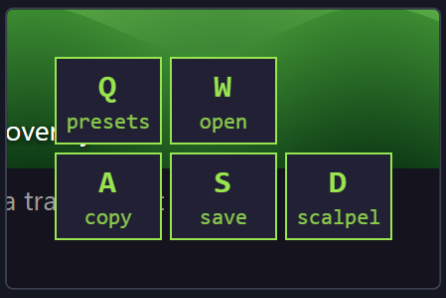

3 Wheel: closer / farther (100–300%). Drag to move.

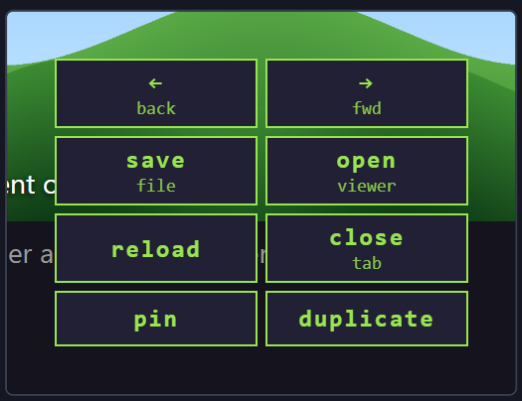

4 Close: `Esc` or slider to 0.

08. Switching tabs

1 Quick menu open (`Ctrl` + `K` held) + wheel: one tab left/right.

2 Tab menu open (second hold) + wheel: **TAB SPIN** mode — the wheel keeps switching tabs, badge SPIN. Exit: click or the save key.

3 On picture-only tabs (viewer, image files) the wheel switches tabs. On/off: **Wheel switches tabs in viewer** (Behavior).

09. Viewer

Opens with W / Open on a picture. Saved pictures are listed in its history.

1. Viewer tab.

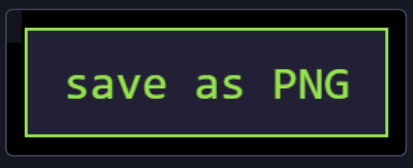

2. Keys: `←` or `Backspace`, `→`.

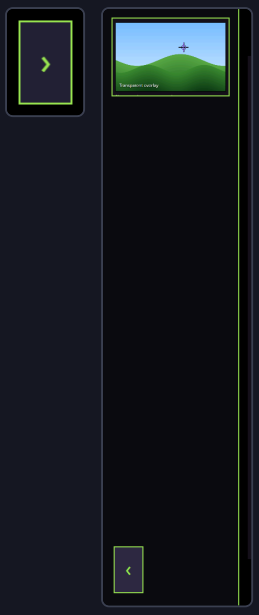

3. Also `Ctrl` + `S` or the save key.

4. Pick a file format.

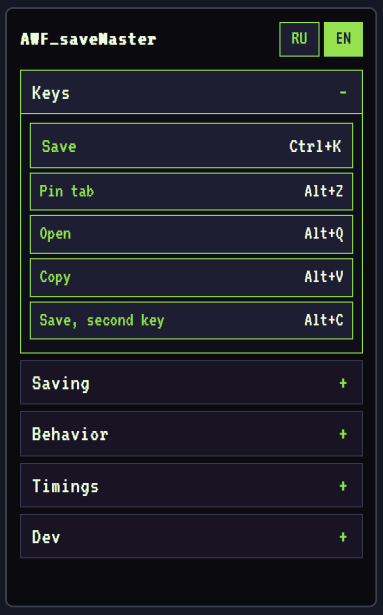

5 History panel; click an entry to open it.

6 Esc — close.

10. Popup: Keys

1. Open Keys.

2. tap = save, hold = menus

11. Popup: Saving

1 Open Saving.

2 inside Downloads

AW_Media

3 click a tag to insert it

Name tags

{original}	original file name, no extension
{ext}	extension, such as jpg or png
{counter}	a number that goes up: 1, 2, 3
{n}	the same number, three

4 not only the link

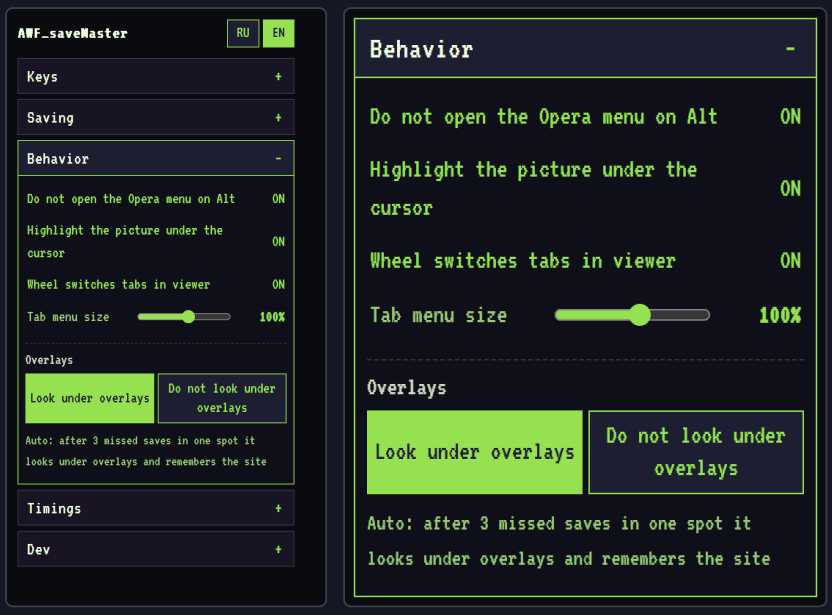

Copy the file itself ON

5 opens it in the extension viewer

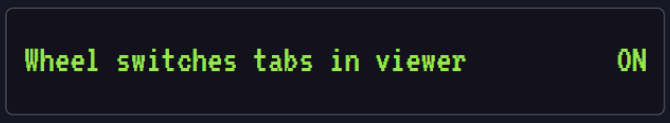

Take over a tab that is just a picture ON

12. Popup: Behavior

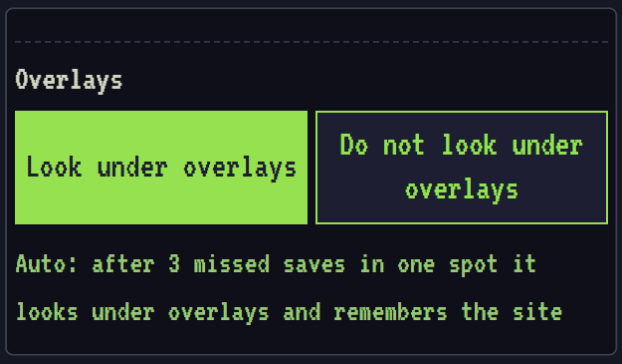

1 Open Behavior.

2 picture-only tabs: viewer, image files → 08

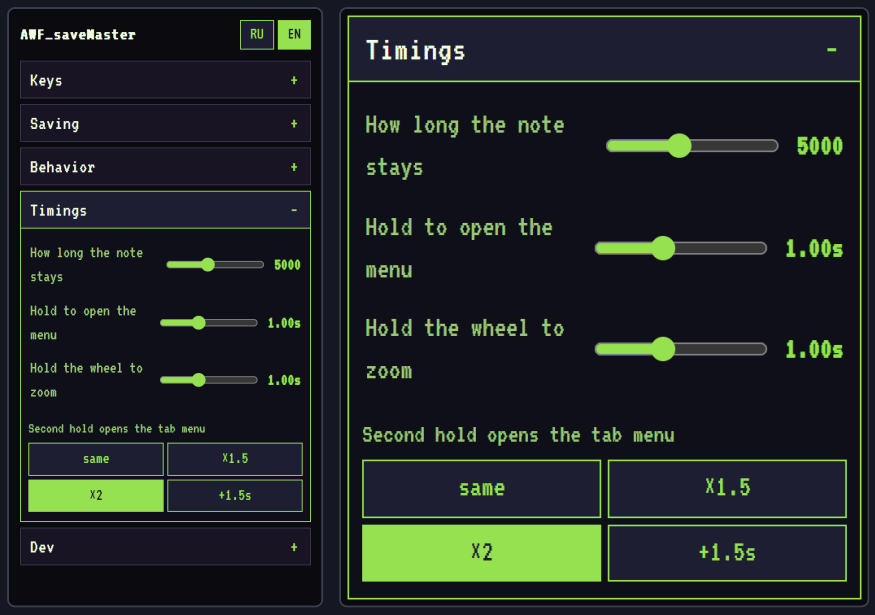

3 auto mode → 06

13. Popup: Timings

1 Open Timings.

2 ms

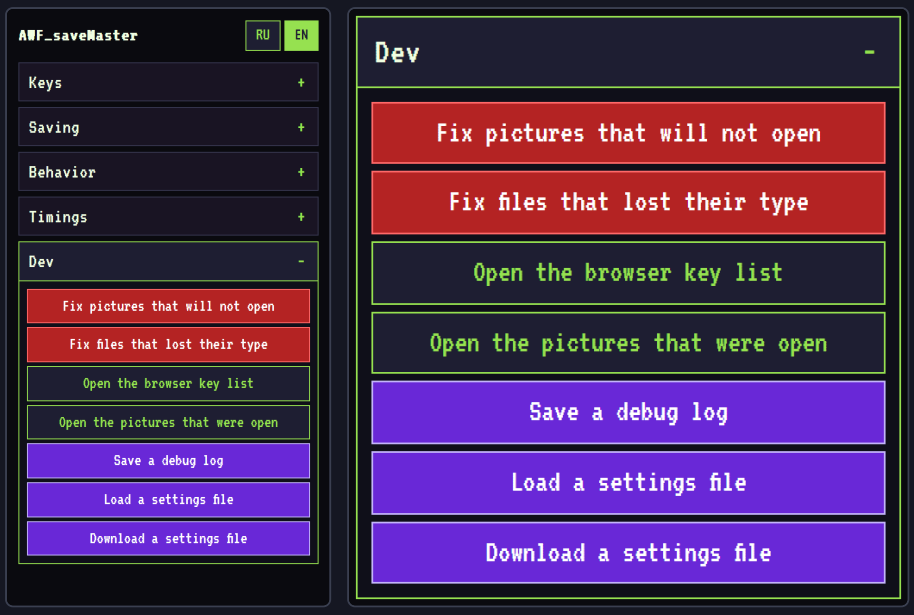

3 relative to the first hold

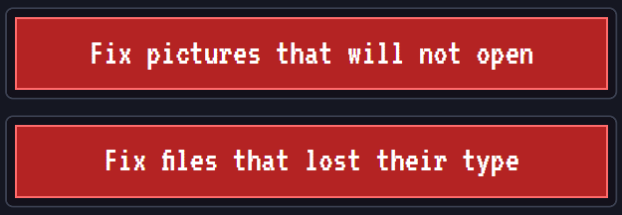

14. Popup: Dev

1 Open Dev.

2 files from the download history

3 viewer tabs from last time

4 for bug reports
